The Right Functionality for Each Role

When you want to coordinate employees across teams and projects or projects across teams with minimal effort, **then Meisterplan is exactly what you're looking for**.

What Meisterplan Is Not

> A detailed task management tool

> A full-scale PPM tool, that can do everything, but is too complex

> A tool that requires all of your data

With Meisterplan, you can view your whole system on the portfolio level and answer your most urgent questions

The Resource Perspective

What projects are my employees working on?

How can I utilize my employees most effectively?

The Project Perspective

Which projects are we doing when?

Are the correct resources available for our projects?

MEISTERPLAN

Typical Use Cases

Customer Solutions Delivery

Guarantee consistent and reliable delivery due to realistic capacity planning.

Product Development

Minimize idle time and time to market in your entire project portfolio through optimal planning.

Agile Product Development

Set up reliable forecasts of your agile teams' work based on all capacities and dependencies.
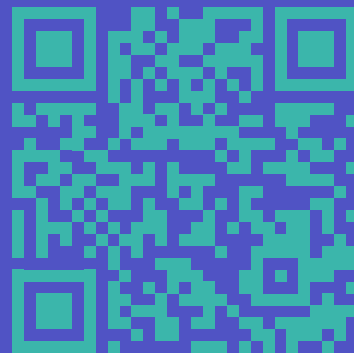

Business Transformation

Move important projects forward by allocating interdepartmental capacities flexibly and specifically.
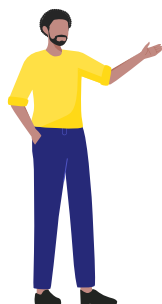

Corporate IT

Increase your internal customers' satisfaction with transparent IT roadmaps.

The Right Functionality for Each Role

In Meisterplan, each type of user works with the exact same data – just in different views. Because we are convinced of one thing: you can only achieve your goals when everyone involved works together.

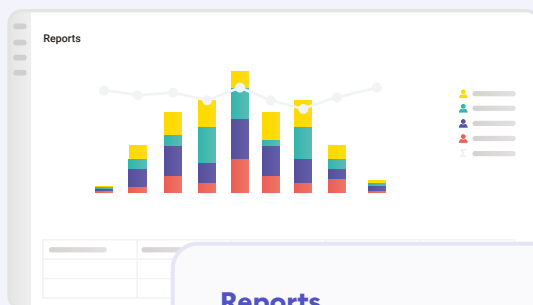

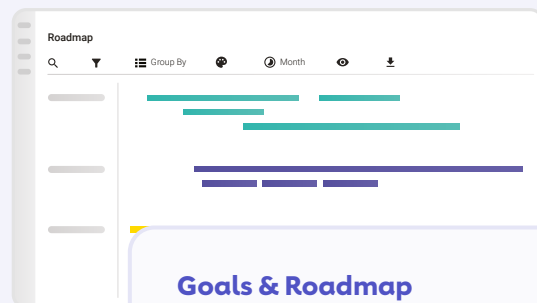

Portfolio Designer
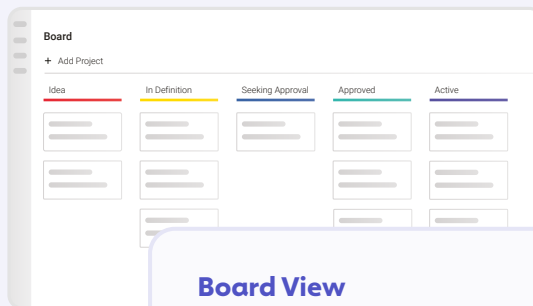

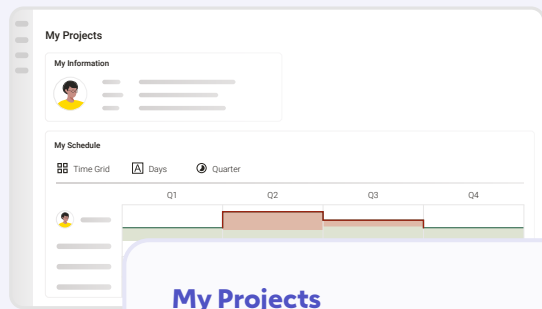

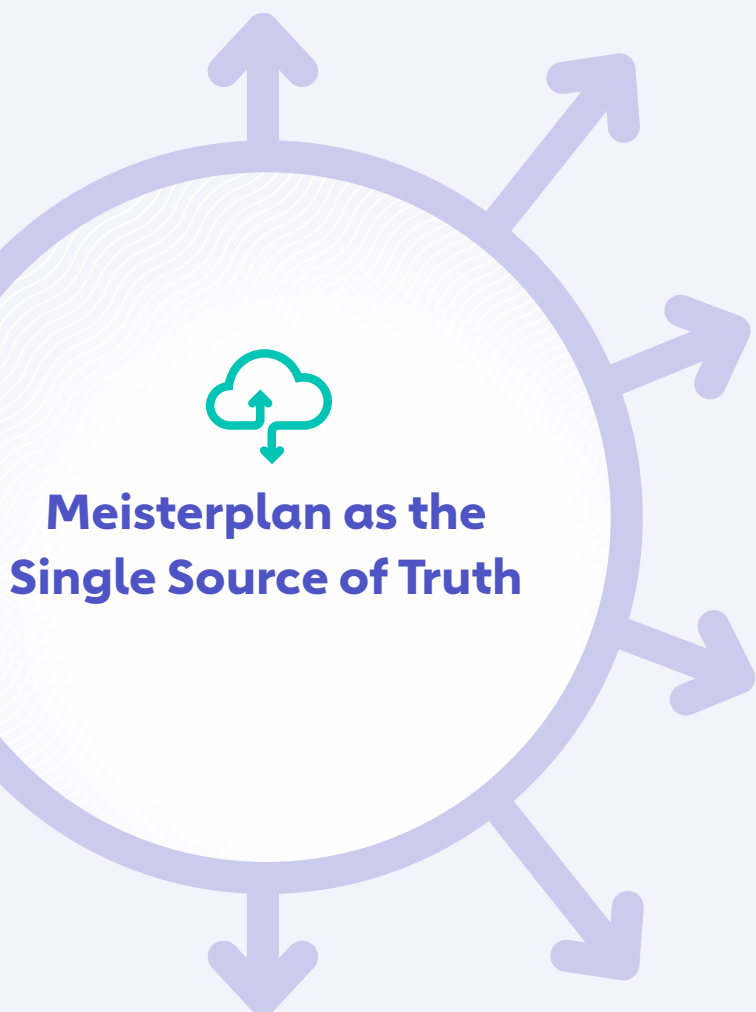

In this interactive view, you can gain an overview of all portfolio and project responsibilities of all projects, resources, and dependencies. With this, you can dynamically plan with drag and drop for all different scenarios preemptively.
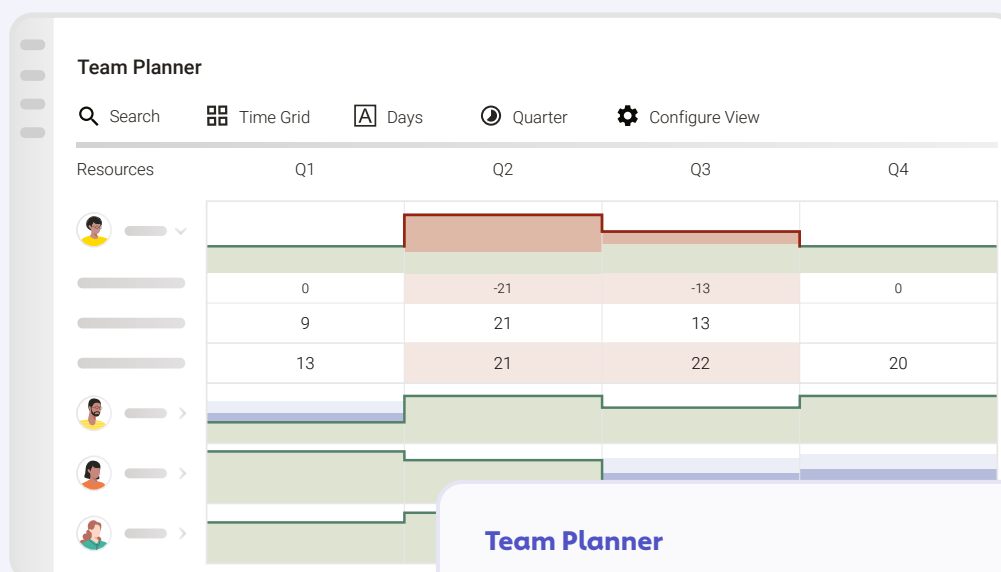

Team Planner

Resource managers can plan the right people for the right time on the right topics, and quickly see if anybody is over allocated.

My Projects

Each employee has an overview of the projects they are assigned to and can easily ask questions about these allocations.

Board View

Guide your projects from conception to implementation with a classic Kanban style visualization directly in Meisterplan.

Financials

View your financial events and allocation costs, and compare planned and actual values.

Meisterplan as the Single Source of Truth

Goals & Roadmap

Input your goals, and evaluate projects based on their value contribution.
The Roadmap shows everyone in your organization where your journey is headed.

Integrations

Connect your tool landscape and exchange relevant data between systems.

Reports

Process your most important figures, and represent plans in a comprehensible way so that management can make well-founded decisions.

A Strong Partner for Your Organization

Many Years of Experience

Our experts know your use cases, and are ready to help you with their knowledge of best practices.

Constant, Transparent Product Development

We're always developing Meisterplan, taking into consideration customer feedback. We share these developments in our Product Roadmap.

Lean Processes

With our Lean PPM method, we can help you optimize your processes.

High Value Help Center

What Our Customers Think

A Strong USP and Simple Usage

"I find the modern, user-friendly environment so impressive that I would absolutely recommend you try out Meisterplan on that basis. You can easily see that Meisterplan has a vision and is constantly developing it further. Additionally, this relationship between the transparency of projects and resource management is a genuine USP."

Daniel Adamski, Hays AG

Finally, Control of Projects and Resources

"We successfully run 400 projects and 20 programs in our portfolio with Meisterplan. Although many have tried, you can't manage that many programs and resources in Excel templates. But you can with Meisterplan."

Christopher Pearson, Siemens Gamesa

Plan Flexibly and Proactively

"Thanks to Meisterplan, I can immediately see what is achievable. I can move projects and resources back and forth in real time, reschedule, improvise and build scenarios. This provides security and makes the resource planning process feasible in the first place."

Mareike Hennschen, Hawesko GmbH
