

Resource Management

Realistic resource and capacity planning to keep your work on track and your employees happy.

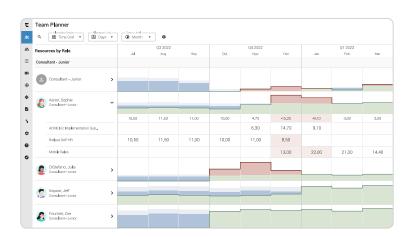

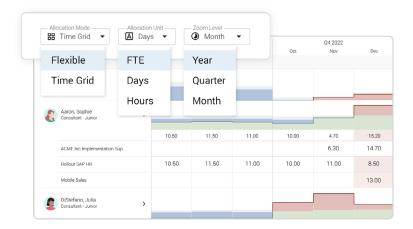

Team Planner

Ensure the right employees are assigned to the right work without being overbooked.

- View resource availability and utilization in real time to realistically allocate resources.
- Identify and escalate resource overallocations even before they occur.
- Resolve conflicts by adjusting allocations to replace resources or stretch efforts.

Easy Allocations

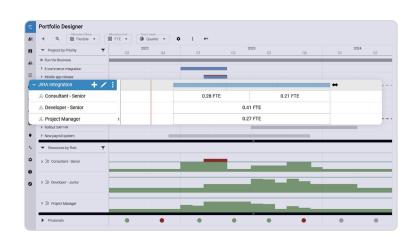

Allocate to the level you need when you need it.

- Plan with roles, teams or resources depending on the desired planning level.
- Allocate by full-time equivalent (FTE), days or hourly based on what fits your needs.
- Customizable allocation view options include a weekly, monthly or quarterly basis using the Grid or Compact mode.

Role-Based Planning

Use roles as a placeholder for individual employees.

- > Estimate and adjust effort needed for new demands based on roles.
- Allocate capacity to roles for planning purposes.
- Reserve role capacity across departments for cross-functional projects.

Staff Roles

Choose specific people who are the best fit for each project role.

- Choose individuals based on role, skills and availability.
- Use Allocation Comments to discuss and request specific people to staff on a project.
- Maximize resource utilization by matching the most qualified and available employees to the most important projects.

Rank Category ↑ Resource Type ↑ Resource Type ↑ Resource Type ↑ Allocation (%) Date ↑= Primary Role ↑ = Oct 2023 2024 Resource Name ↑ = > Consultant - Junior 91.53 112.28 108.44 79.89 40.00 40.00 40.20 Consultant - Senior 46.87 81.16 117.22 104.02 86.55 83.38 75.95 71.98 81.51 87.67 90.32 66.67 Developer - Junior 83.17 86.67 Developer - Senior 79.89 95.13 106.22 99.09 86.55 99.89 83.22 > Project Manager 136.87 164.81 165.89 114.49 93.22 105.29 109.89 Grand Total 83.83 103.46 111.90 95.09 70.72 79.22 77.38

Capacity Reports

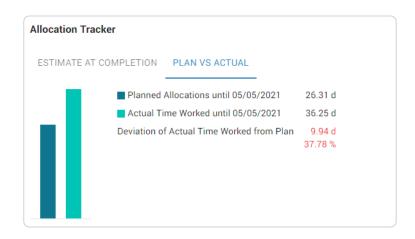

See at a glance which employees and teams are overloaded and who still has free capacity.

- Get a resource-centric view of your projects to understand how much remaining capacity is available.
- Quickly identify allocation issues using the allocation heatmap.
- > Leverage pivot reports for custom resource analyses on the spot.

Plan vs. Actuals

Compare planned allocations and actual time worked to understand how your plan compares to reality.

- Allow team members to enter their own actual time worked to ensure accurate data.
- > Immediately determine when the actual time worked is deviating from the planned effort.
- Continuously improve the accuracy of your resource planning.

Resource Scenario Planning

Test options to resolve resource bottlenecks.

- Instantly see and test alternatives for employees who are overbooked or projects that need more capacity.
- Simulate ways to maximize your resource utilization.
- Use scenarios to reliably plan and communicate on-time delivery, without overbooking resources.

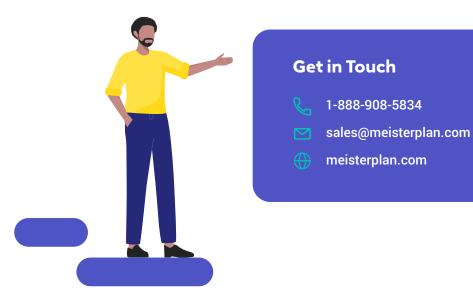

Resource Data

See and edit information on employees and their availabilities.

- Import employee data directly from your HR software.
- Capture capabilities, departments, costs and working hours of internal and external resources.
- Enter individual absences such as vacation, sick time and business trips.
